

DS405 Lubrication Monitor

FEATURES & BENEFITS

- Protect your equipment by capturing critical performance data of your automatic lubrication systems.
- Low flow rate alarm prevents a bearing being starved of lubrication & failing.
- High flow rate alarm prevents the overfilling of bearings & lubricant spilling out.
- Programmable warning & alarm levels for up to 24 bearings with each monitor.

Adding a Bijur Delimon lubrication system increases equipment life by decreasing wear on vital components. The DS405 provides state of the art monitoring of automatic oil or grease lubrication systems.

PROVEN QUALITY, RELIABILITY AND ACCURACY.

DS405 Lubrication Monitor Features

The DS405 is a completely new dedicated product for the monitoring of automatic oil or grease lubrication systems.

Our new DS405 is a highly configurable product that can be adapted for virtually any application.

It records the total lubricant delivered to each bearing and provides the end user with reliable and accurate data.

- Large graphic display for ease of setup and clear monitoring status.
- Immediately communicates alarms to your PLC or our SC400 control, providing protection to all critical lubrication points.
- Real-time clock with warning and alarm data logging up to 1000 events.
- USB port for downloading.
